DETAILED ACTION

1. Applicant's Amendment filed on 3/9/2007 has been entered with amended claims 1, 8, 16, 23, 25 and newly added claims 27-29. In this Office Action, claims 1-29 are pending.

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-15 and 27-29, the independent claims 1 and 27 are claiming for a method of indexing a database. All these claims are drawn to generating database or data structure, classified in class 707, subclass 102.
- I. Claims 16-26, the independent claims 16 and 25 are claiming for a method of looking up records in a database. All these claims are drawn to database query processing, classified in class 707, subclass 3.

2. The inventions are distinct, each from the other because of the following reasons:

Inventions I-II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant application, each of the respective inventions have a separate utility as in a system not having the others. See MPEP ' 806.05(d).

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
4. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for any other group, restriction for examination purposes as indicated is proper.
5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their recognized divergent subject matter, restriction for examination purposes as indicated is proper.
6. A telephone call was made to Mr. Leslie S. Garmaise (legal representative of the applicant) on May 18, 2007 to request an oral election to the above restriction requirement, but did not result in an election being made.
7. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
8. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(l).
